MIAMI Mortar Cement Types N, S

Manufacturer:
Fairborn Cement Company
3250 Linebaugh Rd
Xenia, OH 45385
800-762-0040 / www.fairborncement.com

Product Description:
Fairborn Cement Company’s MIAMI mortar cements are specifically formulated and manufactured to produce masonry mortar for use in concrete masonry units, brick, and stone masonry construction applications where flexural bond strength and lower air contents are required or preferred.

Fairborn Cement Company’s MIAMI mortar cement is a high quality, versatile product formulated with finely ground Portland cement, mineral additives, specialty admixtures and pigments to meet a wide variety of construction requirements including colored mortar cement. All constituent materials are proportioned at the cement plant under strict quality conditions to consistently provide users with a quality product.

Types:
Fairborn Cement Company’s MIAMI mortar cement is manufactured in accordance with ASTM C1329 in preparation to making ASTM C270 Types S and Type N strength mortar. MIAMI mortar cements are designed to be mixed with clean water (free of injurious amounts of any substances that may be harmful to mortar or metal accessories in the masonry) and sand conforming to ASTM C144. No further additions are required or recommended.

For a general guide of mortar type to be used based on construction application, refer to ASTM C270. Other factors to consider are type and absorption of masonry units, exposure and climatic conditions, applicable building codes and engineering practice standard requirements.

Quality:
Fairborn Cement Company is committed to quality and takes pride in the products we manufacturer. We manufacture products using only high quality raw materials and strict quality control procedures. Fairborn Cement Company is the local leader in quality cement production.

Standards:
The following standards apply to the use of Fairborn Cement Company’s Mortar Cements:
ASTM C1072 (Standard Test Methods for Measurement of Masonry Flexural Bond Strength).
ASTM C780 (Standard Practice for Pre-Construction and Construction Evaluation of Mortar for Plain and Reinforced Unit Masonry).
ASTM C144 (Standard Specification for Aggregates for Masonry Mortar).

Physical Properties:
MIAMI mortar cements conform to the physical requirements of ASTM C1329.

Table 1: Physical Requirements of ASTM C1329 Mortar Cements.

Preparation:
Preparation of masonry mortar using MIAMI mortar cement is to be prepared in accordance with ASTM C270 under either the Proportion Specification or Property Specification Requirements as dictated by the project specifications.

The property specification proportions for cement to sand ratios are to be in the range of 1:2 ¼ to 1:3 ½. Compressive strength, water retention and maximum air content should meet the requirements of Table 3.

Under the property specification, no changes shall be made to the accepted laboratory established proportions in the field, other than water content. If materials other than those used to establish conformance are to be used in the work, reestablishing conformance to the property specification is required.

Mixing of the mortar should be accomplished by means of a mechanical paddle mixer whenever possible. While the mixer is running, 1) Add 2/3 of the potable water. 2) Add ⅓ of the ASTM C144 sand. 3) Add Fairborn Cement Company’s MIAMI mortar cement. 4) Add the remaining ASTM C144 sand. 5) Add the remaining potable water to achieve the desired consistency and mix for a minimum of 5 minutes.

**Hot Weather:**
Hot sun, drying winds and summer temperatures can lead to rapid evaporation of the mixing water from the prepared mortar. This evaporation of water can lead to reduced workability and shorten the life of the mortar. Precautions such as shading materials and mixer, covering transfer equipment and dampening mortar boards should be used to combat the effects of hot weather.

**Cold Weather:**
Prepared mortar should be mixed and maintained at a temperature above 40°F as prescribed by cold weather masonry specifications. Common methods used to meet this requirement are by heating the mixing water or aggregate. Protection of the newly installed mortar should also follow the prescribed methods outlined in cold weather masonry specifications.

**Product Precautions:**
Products may cause severe burns and injuries to the skin, eyes, lungs and digestive system. Avoid contact with skin and eyes. Wash exposed skin with soap and water. In case of eye contact, flush eyes immediately and thoroughly, and in both instances, consult a physician immediately. Breathing product dust may cause nose, throat or lung irritation or choking. Prolonged exposure to products may cause lung injury, including silicosis and products may contain crystalline silica, a substance that may cause lung cancer. If breathing becomes difficult due to exposure, remove exposed person to fresh air and consult a physician. Gross ingestion of products may cause digestive system injuries or intestinal discomfort. If ingestion occurs do NOT induce vomiting, but drink plenty of water and consult a physician. Keep out of the reach of children. Follow directions and warnings on Product packaging.

For other precautions please refer to the Fairborn Cement Company’s MIAMI mortar cement SDS.

**Availability:**
Type N and S MIAMI mortar cement is available in bagged quantities at:
3250 Linebaugh Road
Xenia, OH 45385
Also, available through a vast network of partnering distribution companies.

For information related to Fairborn Cement Company’s colored MIAMI mortar cement, including the standard color chart, please contact your local sales representative.

**Warranty:**
LIMITED WARRANTY. The products shall conform to applicable specifications of the American Society for Testing and Materials, and such other specifications. Seller, having no control over the use of the product does not guarantee finished work, nor shall seller be responsible for the condition of the Product after delivery to the buyer. Charges incident to inspection or testing made by or on behalf of buyer to determine compliance with specifications shall be paid for by buyer.
EXCEPT FOR THE LIMITED WARRANTY MADE ABOVE, SELLER SPECIFICALLY DISCLAIMS ANY OTHER WARRANTY, INCLUDING ANY EXPRESS WARRANTY, ANY IMPLIED WARRANTY OF MERCHANTABILITY OF GOODS, AND ANY IMPLIED WARRANTY OF FITNESS OF GOODS FOR ANY PARTICULAR PURPOSE, ALL OF SUCH WARRANTIES ARE EXCLUDED AND SPECIFICALLY DISCLAIMED BY SELLER.
