The Fairborn Cement Company takes pride in finding locally available materials that are being landfilled and utilizing them as raw materials. Doing so extends the life of landfills, extends the life of naturally occurring raw materials, and also qualifies our cements for Leadership in Energy and Environmental Design (LEED) credits.

Our manufacturing facility is located at 3250 Linebaugh Road, in Xenia, Ohio. All Fairborn Cement Company cement types contribute to earning the recycled content for pre-consumer credits per LEED Materials and Resource, no. 4, and LEED Materials and Resources, no. 5 for regional materials. All raw materials are also extracted within 500 miles of the manufacturing facility. The following list shows the percent of pre-consumer recycled content per cement type:

ASTM C150 Type I/II – 9.1%
ASTM C150 Type III – 10.6%
ASTM C150 Type IA – 7.5%
ASTM C91 Type N – 6.6%
ASTM C91 Type S – 6.6%
ASTM C91 Type M – 8.2%
ASTM C1329 Type N – 8.2%
ASTM C1329 Type S – 8.2%

Please contact us if a specific LEED letter is needed for a project.
